	He conquered the Saxons but under particular conditions, the chief of which was, not to be looked upon as [?] one & the same with the Franks, but as a separate people enjoying the same privileges with the others & governed by one Sovereign. This is also looked upon as the ^original^ foundation of the ^distinction of ^ the Saxon laws, as well as & those of the ^prevailing upon^ the Rhein. One of the [?] chief methods he employed to conquer the Saxons was forcing them to become Xtians. He build a church a Paderborn for the encouragement of Xtianity & as he became more powerful he founded the Bishopwricks of Osnabruck, Minden Halberstadt, Verden, Bremen, Munster & the for the Bishop of Hildesheim Habitation residence He fixd -named Elze situated between Hannover & Einbeck partly for its beauty as also being a place

Claudia Ardevines Puyuelo's key to the number codes:

The Queen assigned a value to each of the 5 vowels, and for bigger numbers, she sometimes combined the vowels needed to get the number necessary:

a/b = 1

e/d = 2

i/t = 3

o/f = 4

u/l = 5

au/s = 6

oi/p = 7

ui/k = 8

y/z = 0
